VOLUME CONTENTS

Number 1

A. M. Robertson and S. J. Muller	1	Flow of Oldroyd-B fluids in curved pipes of circular and annular cross-section
B. Banerjee, A. K. Bajaj and P. Davies	21	Resonant dynamics of an autoparametric system: a study using higher-order averaging
M. Jones	41	Evolution equations and stability results for finite-depth Wilton ripples
H. S. Y. Chan, K. W. Chung and Z. Xu	59	A perturbation–incremental method for strongly non-linear oscillators
P. A. Djondjorov and V. M. Vassilev	73	Conservation laws and group-invariant solutions of the von Kármán equations
Liu Ren-huai	89	Non-linear buckling of symmetrically laminated, cylindrically orthotropic, shallow, conical shells considering shear
Liu Ren-huai	101	On non-linear buckling of symmetrically laminated, cylindrically orthotropic, truncated, shallow, spherical shells under uniform pressure including shear effects

Number 2

Hin-Chi Lei and Huei-Wen Chang	117	A list of hodograph transformations and exactly linearizable systems
K. Vajravelu and E. Soewono	129	Fourth-order non-linear systems arising in combined free and forced convection flow of a second-order fluid
C. S. Xu, Z. Q. Xia and C. Y. Chia	139	Non-linear theory and vibration analysis of laminated truncated, thick, conical shells
M. Chiba	155	Non-linear hydroelastic vibration of a cylindrical tank with an elastic bottom containing liquid—III. Non-linear analysis with Ritz averaging method
M. S. Soliman	167	Jump phenomena resulting in unpredictable dynamics in the driven damped pendulum

D. Capecchi, R. Giannini and R. Masiani 175 Motion of a rigid body with a rounded base due to harmonic excitation

Le-Chung Shiau and Teng-Yuan Wu 193 A finite-element method for analysis of a non-linear system under stochastic parametric and external excitation

M. A. Itskovits 203 Generalization of the Achenbach–Chao model for waves in non-linear hereditary media

A. A. Lokshin and M. A. Itskovits 211 Increase of the simple wave maximum amplitude in active media

M. G. Henders and A. C. Soudack 215 Dynamics and stability state-space of a controlled inverted pendulum

I. Elishakoff, S. Marcus and J. H. Starnes Jr 229 On vibrational imperfection sensitivity of Augusti's model structure in the vicinity of a non-linear static state

237 Announcement

Number 3

R. Haberman and E. K. Ho 239 Higher-order change of the Hamiltonian between saddle approaches by phase plane matching

W. Szemplińska-Stupnicka and J. Rudowski 255 On minimum safe impulsive velocity in the driven escape oscillator

M. Pakdemirli, M. Yürüsoy and A. Küçükbursa 267 Symmetry groups of boundary layer equations of a class of non-Newtonian fluids

Keng-Huat Kwek and Jibin Li 277 Chaotic dynamics and subharmonic bifurcations in a non-linear system

D. W. Raboud, M. G. Faulkner and A. W. Lipsett 297 Multiple three-dimensional equilibrium solutions for cantilever beams loaded by dead tip and uniform distributed loads

S. H. Lee and A. M. Waas 313 Initial post-buckling behavior of a finite beam on an elastic foundation

W. X. Ma and B. Fuchssteiner 329 Explicit and exact solutions to a Kolmogorov–Petrovskii–Piskunov equation

M. Senthil Velan and M. Lakshmanan 339 Lie symmetries and invariant solutions of the shallow-water equation

W. K. Waldron Jr and A. Wineman 345 Shear and normal stress effects in finite circular shear of a compressible non-linear viscoelastic solid

J. C. Umavathi 371 A note on magnetoconvection in a vertical enclosure

C. Currò and G. Valenti 377 A linearization procedure for quasi-linear non-homogeneous and non-autonomous 2×2 first-order systems

L. Hajji, Ph. Pascal and B. Oesterlé 387 A simple description of some inertia effects in the behaviour of heavy particles in a turbulent gas flow

Kee-Ho Yu, T. Takahashi and H. Inooka 405 First integral approach to non-linear motion analysis of a two-link system

413 Erratum

415 Announcements

Number 4

J. M. Klebanov 419 Uniqueness of solutions of non-homogeneous and anisotropic problems of non-linear viscoelasticity

M. Sabir and G. A. Maugin 425 On the fracture of paramagnets and soft ferromagnets

C. Rogers, B. G. Konopelchenko, M. P. Stallybrass and W. K. Schief 441 The Nizhnik–Veselov–Novikov equation: associated boundary value problems

H. M. El-Sherbiny and L. Debnath 451 A note on the equivalence of Bäcklund transformations and the inverse scattering method for a class of non-linear differential equations

M. Veskovic 459 On the instability of equilibrium of non-holonomic systems with a non-analytic potential

Hin-Chi Lei and J. A. Blume 465 Lie group and invariant solutions of the plane-strain equations of motion of a neo-Hookean solid

E. Dragoni	483	The radial compaction of a hyperelastic tube as a benchmark in compressible finite elasticity
R. L. Fosdick and Jang-Horng Yu	495	Thermodynamics, stability and non-linear oscillations of viscoelastic solids—I. Differential type solids of second grade
Geng Xie and J. Y. K. Lou	517	Alternating Frequency/Coefficient (AFC) technique in the harmonic balance method
Geng Xie and J. Y. K. Lou	531	Alternating Frequency/Coefficient (AFC) technique in the trigonometric collocation method
		Technical Note
B. N. Rao	547	Flow of a fluid of second grade over a stretching sheet

Number 5

METHODS FOR NON-LINEAR STOCHASTIC STRUCTURAL DYNAMICS

G. I. Schuëller	551	Foreword
A. Naess and V. Moe	553	Stationary and non-stationary random vibration of oscillators with bilinear hysteresis
L. M. Laudański	563	Designing random vibration tests
M. A. Ismaili	573	Design of a system of linear oscillators spectrally equivalent to a non-linear one
S. Caddemi and M. Di Paola	581	Ideal and physical white noise in stochastic analysis
V. Monbet, M. Prevosto and J. Deshayes	591	Joint PDF parametric models for the rate of upcrossings of the acceleration for a non-linear stochastic oscillator
K. R. Gurley, A. Kareem and M. A. Tognarelli	601	Simulation of a class of non-normal random processes
H. Grundmann and H. Waubke	619	Non-linear stochastic dynamics of systems with random properties: a spectral approach combined with statistical linearization
W. D. Iwan and Ching-Tung Huang	631	On the dynamic response of non-linear systems with parameter uncertainties
G. Q. Cai and Y. K. Lin	647	Exact and approximate solutions for randomly excited MDOF non-linear systems

S. F. Wojtkiewicz, B. F. Spencer Jr and L. A. Bergman 657 On the cumulant-neglect closure method in stochastic dynamics

K. R. Schenk-Hoppé 685 Stochastic Hopf bifurcation: an example

J. Náprstek 693 Stochastic exponential and asymptotic stability of simple non-linear systems

W. V. Wedig 707 Iterative schemes for stability problems with non-singular Fokker–Planck equations

P. Bar-Avi and H. Benaroya 717 Response of a two degrees of freedom articulated tower to different environmental conditions

B. Hu, S. Schaub and W. Schiehlen 743 Boundedness evaluation of structural systems with randomly distributed initial conditions

S. McWilliam 755 Random response of catenary moored offshore vessels to non-linear wave forces

A. K. Belyaev and H. Irschik 771 Non-linear waves in complex structures modelled by elastic–viscoplastic stochastic media

C. Floris 779 Equivalent Gaussian process in stochastic dynamics with application to along-wind response of structures

A SELECTIVE PERSPECTIVE ON NON-LINEAR MECHANICS: PROBLEMS AND TECHNIQUES

A FESTSCHRIFT FOR WILLIAM A. NASH

P. D. Spanos 795 Introduction

E. C. Aifantis 797 Non-linearity, periodicity and patterning in plasticity and fracture

F. Baldoni and K. R. Rajagopal 811 Buoyancy-induced deformations in a compressible elastic solid

V. V. Bolotin 823 Brush-like modes of fatigue fracture in unidirectional fibre composites

W. K. Chang, R. A. Ibrahim and A. A. Afaneh 837 Planar and non-planar non-linear dynamics of suspended cables under random in-plane loading—I. Single internal resonance

M. Franaszek and E. Simiu	861	Noise-induced snap-through of a buckled column with continuously distributed mass: a chaotic dynamics approach
I. T. Georgiou and A. F. Vakakis	871	An invariant manifold approach for studying waves in a one-dimensional array of non-linear oscillators
A. N. Kounadis	887	Qualitative criteria in non-linear dynamic buckling and stability of autonomous dissipative systems
F. Ma and W. C. Lee	907	On the equations of non-linear vibrations
J. P. Schmidt, P. Hagedorn and Miao Bingqi	915	A note on the contact problem in an ultrasonic travelling wave motor
C. A. Sciammarella	925	A new fibre optics illumination system for application to electronics holography
T. Smelova-Reynolds and E. H. Dowell	931	The role of higher modes in the chaotic motion of the buckled beam—I
T. Smelova-Reynolds and E. H. Dowell	941	The role of higher modes in the chaotic motion of the buckled beam—II
F. E. Udwadia	951	Equations of motion for mechanical systems: a unified approach
Z. Wu and P. G. Glockner	959	Effects of thermo-mechanical coupling in a plastic cylinder
	I	Volume Contents and Author Index for Vol. 31 (1996)
